SKIN CANCER
BASAL CELL CARCINOMA | SQUAMOUS CELL CARCINOMA | MALIGNANT MELANOMA | MERKEL CELL CARCINOMA | DERMATOFLIBROSARCOMA PROTUBERANS

Skin cancer is the most common malignancy. According to national statistics, one in five people will get a form of skin cancer in their lifetime.

MOHS SURGERY
Dr. Diana Bolotin and Dr. Vivek Iyengar are fellowship-trained dermatologic surgeons who perform the specialized procedure that combines surgical excision with rapid microscopic examination of skin tissue. Mohs surgery is used to remove certain types of skin cancers.

MOLE MAPPING
Digital photography-aided mole mapping is the most advanced method for early diagnosis of skin cancer. Overview images of your body and microscopic photos of suspicious moles are taken to be compared side by side at follow up visits to detect any changes. A copy of your images on a CD is included with your visit.

WE’VE GOT YOU COVERED FROM HEAD TO TOE.

COSMETIC DERMATOLOGY
Healthy and beautiful skin requires maintenance. Whether you want to simply restore a youthful appearance with cosmetic surgery or reduce the appearance of varicose veins or skin discoloration, we have a service and a dedicated professional specifically for you.

Cosmetic consultations
Cosmetic surgery
Eyelid rejuvenation
Dermabrasion
Melasma therapies
Sclerotherapy for varicose veins
Vascular lesion destruction and rosacea treatment
Botox or Dysport treatments for wrinkles and hyperhidrosis

LIGHT THERAPY
Light therapy is a highly effective outpatient treatment for many skin conditions. It works by slowing down cell growth and inflammation which causes certain skin conditions. Some forms of light therapy are also highly effective cosmetic treatments and can greatly enhance the appearance of skin.

UVA-1 Therapy
Excimer Laser Therapy
Blue Light Photodynamic Therapy
Narrow Band Ultraviolet B Therapy
Psoralen and Ultraviolet A (PUVA) Therapy

ETHNIC AND DARKER SKIN
Unlike some other centers, our dermatology team has extensive experience diagnosing and treating all skin types. Our physicians are skilled in performing laser hair removal, laser resurfacing, other light therapies and scar remodeling.

PEDDiatric DERMATOLOGY
Dr. Sarah Stein is an expert in the diagnosis and management of childhood skin diseases, including eczema and other dermatitis, psoriasis, pigmentedary disorders, birthmarks, disorders of hair and nails, infectious skin conditions, and cutaneous manifestations of internal diseases. She is triple-board certified in pediatrics, dermatology and pediatric dermatology. Dr. Stein also sees patients at:

University of Chicago Pediatric Specialists
7350 College Drive
Palos Heights, IL 60463

IMMUNOCOMPROMISED
SKIN CONDITIONS OF THE IMMUNOSUPPRESSED
Immunocompromised patients have a significantly higher risk of developing skin cancer than the general population. The Section of Dermatology has a specific specialty clinic for patients with weakened immune systems. This includes transplant patients, patients on chemotherapy and those with HIV. This clinic is also the only dedicated HIV dermatology specialty clinic in Chicago.
