Endoscopic ultrasound (EUS) has become a widespread endoscopic technique in the diagnosis, staging, and biopsy of gastrointestinal malignancies. Course highlights include two full days of live EUS procedures, interactive debates, video quizzes, and lectures. There will also be an optional half-day hands-on lab where the expert faculty will teach important EUS skills and techniques.

Target Audience: This activity has been planned for Gastroenterologists, Endoscopists, Endosonographers, Surgeons, Oncologists, and GI fellows committed to the advancement of endoscopy.

This activity has been approved for AMA PRA Category 1 Credit™.
